

## Goal:

1. I will take only 2 days to complete client's Website
2. We need to create as many templates in Elementor in Subdomain

## Process:

1. Hosting
  1. Namehero
    1. Subdomain - Get it from Emran
2. How to create a SubDomain
3. Install Wordpress
  1. <https://www.template.instawebhosting.net/wp-admin/>
  2. admin / Melbourne12#
4. Install Hello Elementor Theme
5. Delete all other themes
6. Go to Plugin and Install Elementor
7. Install Elementor Pro
8. Install Envato Elements
9. -----
10. Select a Template and recreate the whole website exactly
- 11.
